

## Pre-Conference Seminar

**June 3, 2012** (Sunday), 4p-5p, **Hyatt Regency Dearborn**  
No Charge; please indicate interest to [pho@lstc.com](mailto:pho@lstc.com)

### **New Features in LS-PrePost®**

Presenter: Philip Ho

This one hour and 15 minutes seminar will present the general features of the latest version of LS-PrePost:

1. Geometry engine that is capable of creating and editing geometry entities
2. Meshing: automatic surface meshing, 3D solid meshing, simple geometry meshing, line sweeping
3. Finite element model creation and modification
4. LS-DYNA data creation and modification
5. LS-DYNA model checking
6. Post-processing using the new fast rendering
7. New XY plot interface
8. Batch mode operation
9. New applications:
  - \* Metal forming easy setup
  - \* Die system module for die face engineering
  - \* Airbag folding setup for LS-DYNA simulation

At 5:00pm, Registration opens for those attending  
**12<sup>th</sup> International LS-DYNA® Users Conference**
